

# Break Secure Cylinder

Developed in response to demand from locksmiths and crime reduction advisers, the Break Secure Cylinder greatly reduces the risk of intrusion from Euro Profile Cylinder attack.

With break-ins from cylinder attack on the increase the Mul-T-Lock Break Secure Cylinder is designed to maintain the key operation capability even after cylinder damage through abuse.

Developed to overcome problems found in PVCu and Stormproof doors, but suitable for all other door types, the Mul-T-Lock Break Secure Cylinder is available in a variety of sizes across the Integrator Range.

This cylinder is also suitable where locks are subject to vandalism.

The advertisement features a dark blue background. At the top left is the Mul-T-Lock logo, a white key with a hand holding it, next to the text "MUL-T-LOCK®". In the top right corner is a red dashed circle containing the text "PAT. PENDING". The main title "Break Secure Cylinder" is written in large white letters. Below the title, a white text box contains the message "No PVCu door should be without one!". The central part of the ad is divided into two images: on the left, a close-up of a brass door handle with a broken, bent metal cylinder; on the right, a person in a camouflage jacket using a tool to force open a door. A large red "Stop this" is written diagonally across the person's image. Below these images, the text "Fit this" is followed by an image of the Mul-T-Lock Break Secure Cylinder and a key.
